

#2

Worksheet to Assess Morning Basal

Guidelines:

- Eat a carb free breakfast
- Avoid strenuous exercise on day of assessment
- At start of assessment morning blood sugar must be under 250 (DO NOT GIVE CORRECTION)
- Blood sugar above 300 **STOP** assessment and give correction
- Blood sugar under 80 **STOP** assessment and treat
- Check BG every 1-2 hours throughout the morning (*you may use sensor glucose readings instead of checking BG, if you have been wearing your sensor for at least 12 hours or longer*)
- This assessment does NOT need to be done on consecutive days

#1 Morning

START					END
Time:	Time:	Time:	Time:	Time:	Time:
